### DETAILED ACTION

Claims 1-7 are pending and subject to restriction requirement.

#### *Restriction*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a method for inhibiting attachment of *H.influenza* and for treating or preventing *Otitis media* by administering a medicinal composition derived from *Pogostemon cablin* and/or *Agastache rugosa*, classified in class 424, subclass 9.1, for example.
- II. Claims 6 and 7, drawn to a composition derived from *Pogostemon cablin* and/or *Agastache rugosa*, classified in class 424, subclass 725, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product such as a composition derived from *Pogostemon cablin* and/or *Agastache rugosa* {POGOSTEMI HERBA, see specification page 3, lines 21-22} be used in materially different processes for treating drug dependent patients {US 4,569,843, see abstract or at col. 1, line 47}, for treating alcoholic intoxication {CN 1063796, see English abstract} and/or for treating fever, intestinal disorders, skin pathogens, etc. (see specification pages 3-4).

Art Unit: 1651

The several inventions above are independent and distinct, each from the other. They have acquired a separate status in the art as a separate subject for inventive effect and require independent searches (as indicated by different classification). The search for each of the above inventions is not co-extensive particularly with regard to the literature search. Further, a reference which would anticipate the invention of one group would not necessarily anticipate or make obvious the other group. For these reasons restriction for examination purposes is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vera Afremova whose telephone number is (703) 308-9351. The examiner can normally be reached on Monday to Friday from 9:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Wityshyn, can be reached on (703) 308-4743. The fax phone number for this Group is (703) 308-4242.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
